

```
public class Main {  
    public static void main (String[] args) {  
        int beerNum = 99;  
        String word = "bottles";
```

```
    } // end main method  
} // end class
```

```
public class Main {  
    public static void main (String[] args) {  
        int beerNum = 99;  
        String word = "bottles";  
  
        while (beerNum > 0) {
```

```
        } // end while loop  
    } // end main method  
} // end class
```
